

**UCSD Combined Med-Peds  
Residency Training Program  
San Diego, California**

*"The flexibility of the calendar is invaluable, given the crazy scheduling that occurs when a bunch of doctors have to coordinate call schedules, conference dates, and what's left of our personal lives. I'd be lost without DayKeep."*

- Matthew Niedner, MD

**"Group-based"** means that you can control the information you are interacting with based on the selected groups with which you wish to participate. For example, a college could create a group for each department, course, faculty and even student. Then

everyone in the same course would share that group's information as well as the information from the other courses in which they are enrolled. A PR Department for the college could share in the information from a number of different student clubs, business office, and the registrar.

**"Web-based"** means that you can access your DayKeep data from anywhere in the world with via the Internet. No transporting data between work and home, and when you are on the go, the dynamic data you share is never more than a login away! With the customizable interface and

numerous preference selections, you get relevant information whenever and wherever you need it.

# DayKeep

With many user-configurable preferences, DayKeep is the ideal way to manage information from numerous sources and groups. Contact [Sales@DayKeep.com](mailto:Sales@DayKeep.com) to find out how Resource Forge can help streamline your information management.

# DayKeep

Resource Forge's DayKeep is a group-based information management application. It's modular nature allows for seamless integration of numerous pre-built elements such as the Calendar, or the Contact Manager. Resource Forge can also build custom modules for your specific needs, such as an online, WAP enabled scheduler for field servicemen.

Kenrick School of Theology  
St. Louis, Missouri

*"DayKeep has tremendous advantages for maintaining the multiple and complex schedules of individuals living and working within residential communities. It's a transformative tool with the strength to help me remain involved in every event on campus and the versatility to keep everyone else from having to."*

- Sebastian Mahfood, Coordinator of Instructional Technology

**MANAGEMENT:** DayKeep organizes and tracks all of your important data and activities. Integrated tools like Calendar, Messages, and Project allow everyone involved to keep track of complex schedules and tasking - without being overwhelmed by the portions that are not relative to the specific individual. User-friendly group structure and security options allow secure and predictable access to your data.

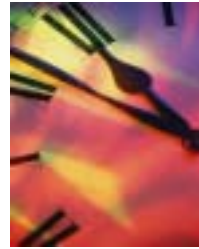

**SHARING:** One place for your shared documents, forms, project tracking, and files. Share contact information across multiple groups with the Contacts tool. Share a working copy of your latest project across town or across the world with FileShare - All from the same user friendly,

Internet-based interface.

**INTEGRATED:** DayKeep tools are integrated where appropriate. A project task's due date from the Projects tool is automatically included in the Calendar. Specified MultiLists can be accessed from within Projects and Contacts information can be referenced from within the

DayKeep's MultiList tool.

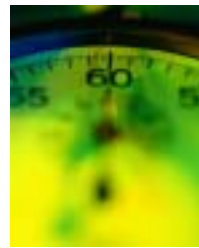

**EXPANDABLE:** Resource Forge has built fully integrated DayKeep tools specific for particular clients' needs. From a grade book for a school to a complex form tied to a database driven inventory, DayKeep can put it all in one user-friendly interface. Let Resource Forge help streamline your data management and communication needs by tailoring a tool specific to your needs.

AudaxCor, LLC  
St. Charles, Missouri

*"I find the Fileshare and Discussion capabilities of Daykeep an invaluable tool for my business. I am able to keep all the information and organization running, even with my employees spread from California to Missouri. My family also appreciates the usefulness and organization that Daykeep's Calander and Multilist features offer, and this is imperative with a busy family of four."*

- Kelly Cope, CEO

**CUSTOMIZABLE:** Different users access data in different ways. DayKeep is built on a highly customizable interface, allowing individual user's to determine their user preferences and save them. When a user logs on to DayKeep, that user's familiar preferences and groups greet them - no matter where on the globe they are logging on from and no matter what computer station they are at.

Friends of Wings Organization  
Fermathe, Haiti

*"DayKeep shows enormous promise in its ability to strengthen the ties of the Haitian transnational community in general and the Wings of Hope Orphanage in Fermathe, Haiti, in particular. Volunteers at Wings are scattered all over the world, but they are able to meet one another, plan itineraries and post data helpful to people who otherwise wouldn't know the immediate needs of the children. DayKeep helps build the global village."*

- Stephanie Mahfood, Coordinator
